

Integrated Community Nursing Implementation The Working Group Meeting update 23 Nov 2015

The third meeting of the Working Group established to provide advice and expertise to inform the development of an implementation plan for the Model of Care was held on the 23rd of November.

Members have a good understanding of the work stream deliverables and are starting to formulate a plan for implementation of the associated activities. The Working Group also identified which work stream they are able to contribute and/or co-opt to progress deliverables.

A draft road map for implementation planning has been developed and the Working Group has identified which work streams will need to commence soon. It was noted that the collection of baseline information was critical to inform the service delivery related work streams and as such needs to commence immediately.

The Working Group confirmed to meet early in the New Year for a face to face workshop to develop detailed implementation planning activities. The approach for the workshop will include the use of patient stories to test the improvement activities that supports the implementation of the Model of Care.

The next meeting will be held on Wednesday 09th of December. The agenda for this meeting will include timeframe for work stream activities, Whanau Ora practices and implementation planning.
